

MARBLE BOUNCE

— EXPECT THE MOST ELECTRIFYING BOUNCE —
IN THE NEW CRASH GAME BY TTT GAMES

MARBLEBOUNCE

TTT Games, a division of Mascot Gaming, introduces Marble Bounce — a physics-driven crash game where every bounce increases the multiplier and challenges the player to decide the right moment to cash out.

Unlike traditional crash titles built on a linear rise, Marble Bounce uses circular motion. The marble ball accelerates inside a closed arena, changes angle after each bounce, and forms unpredictable trajectories.

Every bounce is marked with light and motion trails, making the path readable and helping the player assess risk. The multiplier grows on screen with each rebound, allowing split-second decisions based on observed speed and angle changes.

MOBILE & DESKTOP

Marble Bounce integrates progression directly into play. Bets contribute to player rank, and moving through ranks unlocks additional interface elements and new avatars.

A live leaderboard shows all users taking part in the current round, and also stores records of the biggest wins, making competition a part of the session.

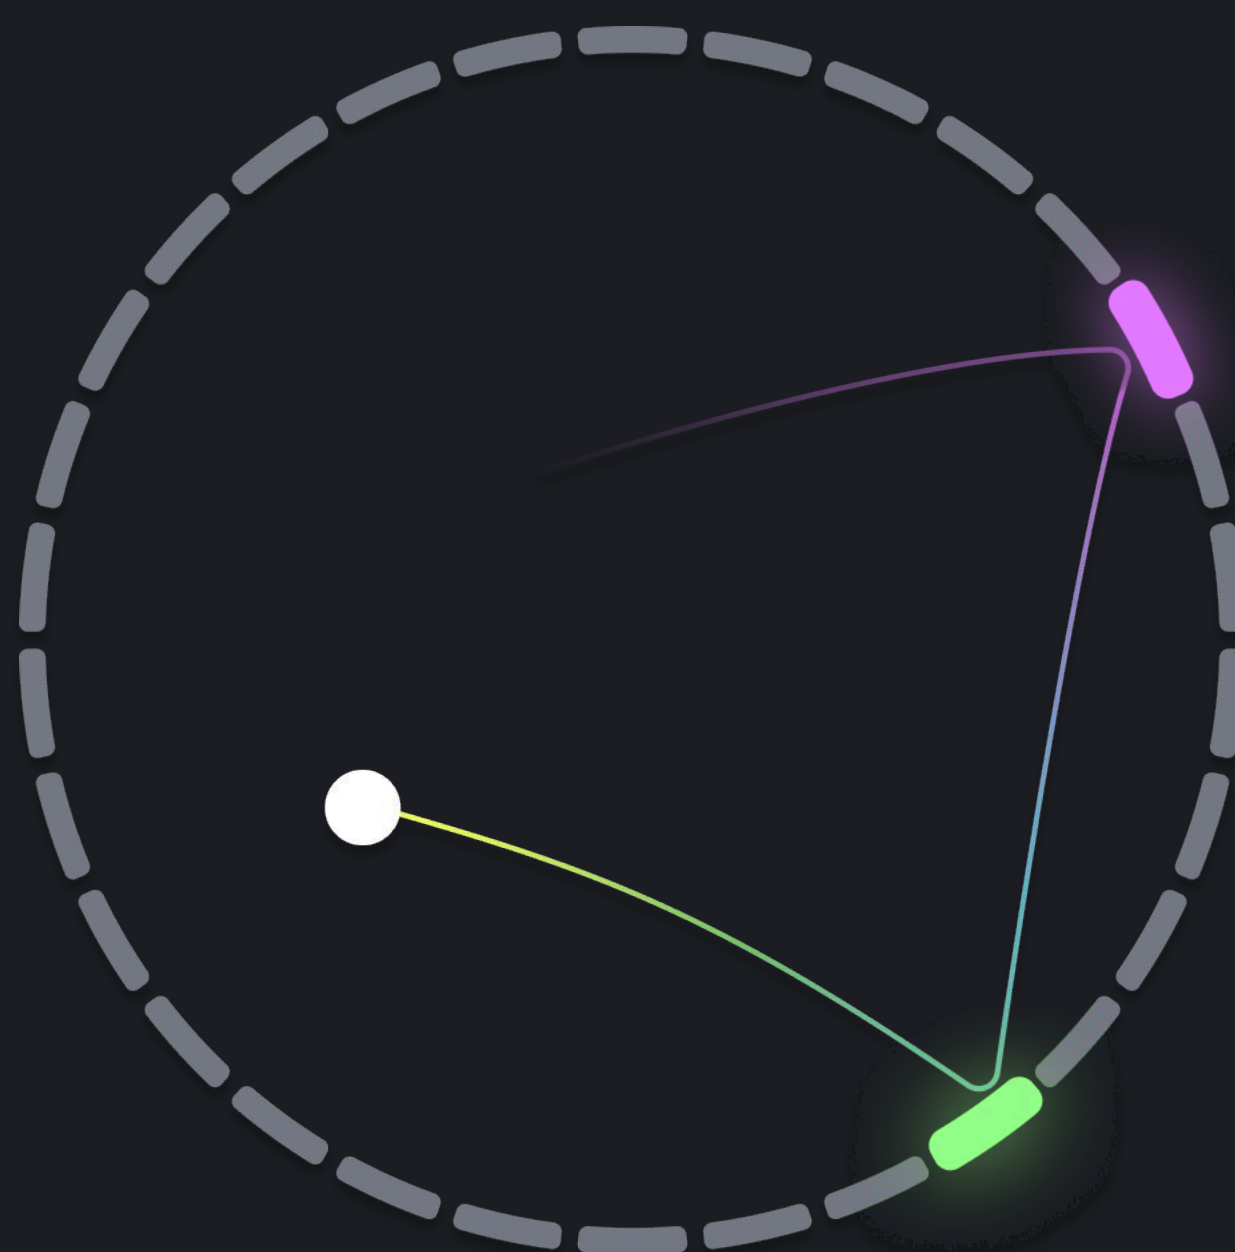

Margarita Malysheva

Head of Marketing at Mascot Gaming

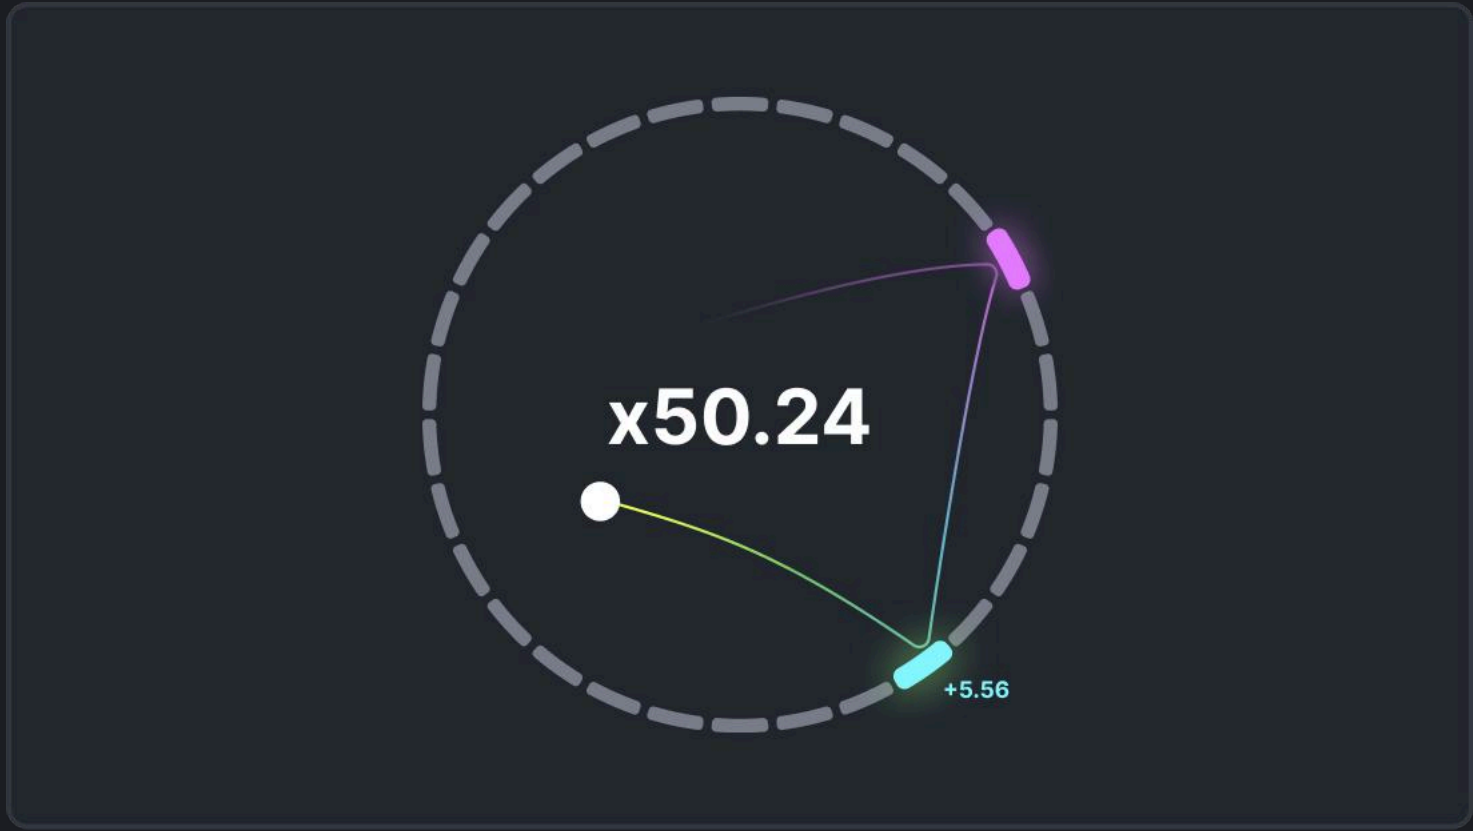

“Marble Bounce explores the crash genre in a new direction.

What excites us most is that no two rounds ever play the same. Physics adds unpredictability in a natural way, without artificial randomness.”

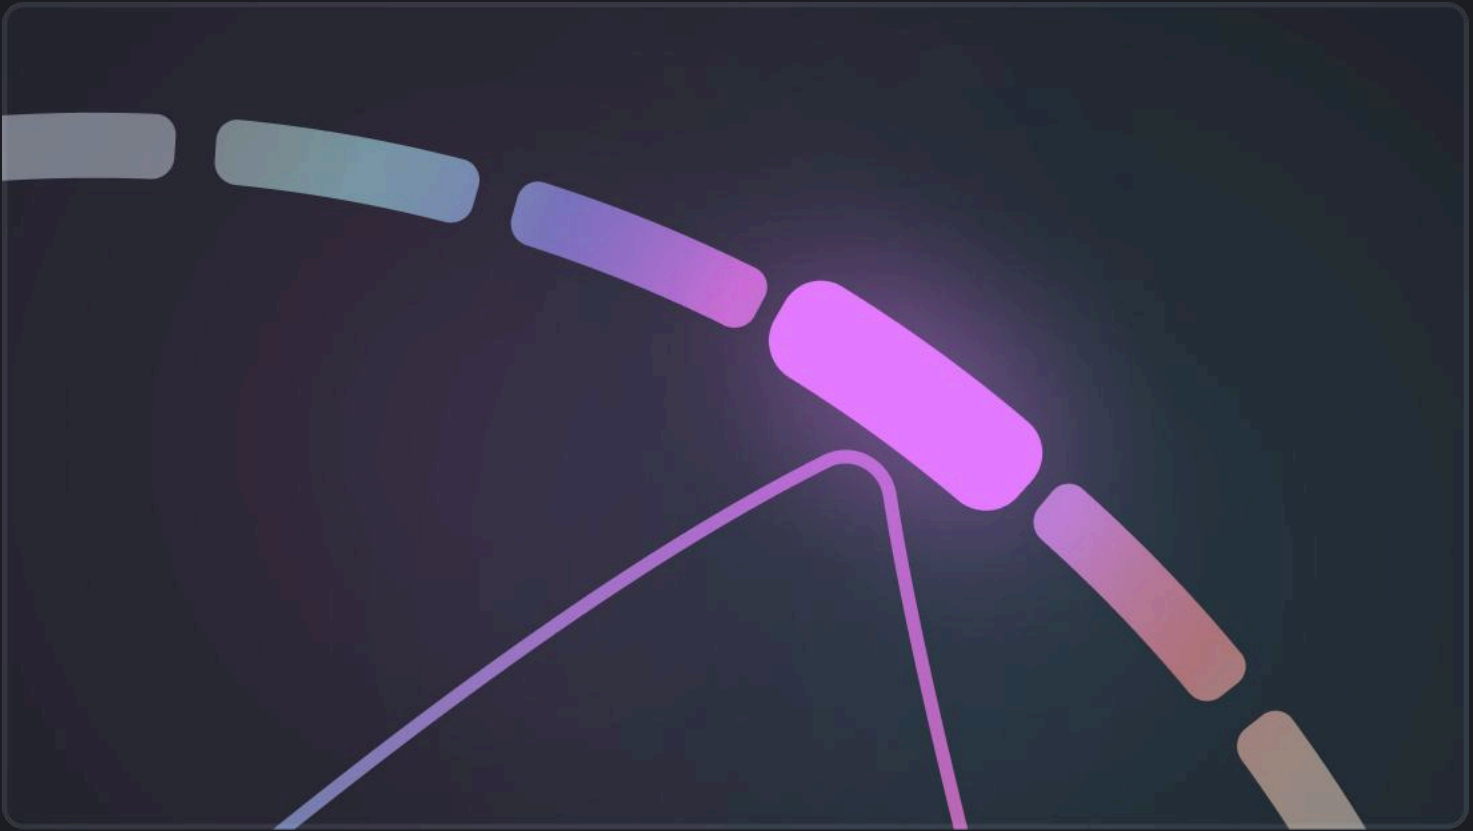

FEATURES

Unique Game Mode

A distinctive crash-style format where the multiplier grows with every bounce inside a circular arena — a gameplay experience not found in any other iGaming title.

Dynamic Color & Motion Effects

A vivid, rhythm-driven visual style with smooth animations and dynamic color accents that captures attention from the first bounce.
