GAME MECHANICS

Riot: Urban Wilds is a 5-reel slot with a variable reel layout, ranging from 1 to 3 rows and offering up to 243 ways to win, powered by the Rockways feature. The game uses the Ways Anywhere payout system, where winning combinations can start from any reel, and the reels do not need to be adjacent.

The slot game features an additional multiplier reel that spins together with the main reels. The multiplier that lands on this reel is applied to the total win of the spin.

Players can activate the Boost feature by placing an additional bet on top of the main bet. When Boost is active, an alternative set of increased multipliers is used on the multiplier reel.

The slot game also offers Risk and Buy, Mascot Gaming's flagship feature. With the Buy option, players can purchase direct access to game features, while after any winning spin they may take advantage of the Risk Gamble option. In this card game, players try to pick a card higher than the dealer's card to double their win.

DESIGN

Riot: Urban Wilds continues the visual identity of Mascot Gaming's iconic Riot series, expanding the recognizable post-apocalyptic world with a bold and immersive presentation. The game features a new, cleaner UI designed to keep the interface intuitive and focused on gameplay. Clear visual feedback, dynamic reel animations, and a distinctive theme help maintain player engagement while ensuring the game stands out in any casino lobby.

Margarita Malysheva,
Head of Marketing at Mascot Gaming:

"The Riot series has become one of the most recognizable universes in Mascot Gaming's portfolio, and Urban Wilds continues to build on that strong foundation. The game combines a proven theme with engaging gameplay and strong commercial features, offering players an immersive experience while giving operators a reliable addition to their slot portfolio."
