

FLYHIGH

EXPERIENCE THE MAGIC IN THE NEW GAME BY TTT GAMES

FLYHIGH

TTT Games, a brand of instant games powered by Mascot Gaming, expands its portfolio with Fly High, a fantasy-themed flight crash game built around progression, interactive boosters, and customizable gameplay.

Each round begins with a witch taking off and flying automatically across a large interactive castle map filled with multipliers, bonuses, bombs, and landing platforms.

Multipliers increase the potential payout, while boosters temporarily change the conditions of the round. Magic Wand destroys nearby bombs, Protective Aura prevents the witch from falling only once, Magnet pulls nearby multipliers and bonuses toward the character, and Speed Potion increases flight speed while allowing bombs to be ignored for a limited time.

The round ends when the witch attempts to land on a platform. A successful landing applies all collected multipliers to the final result, while a failed landing ends the round without a payout.

Players can select different flight speed settings, ranging from slower cinematic flights to faster gameplay sessions. The optional Safe Landing Mode, only available through Buy Feature, guarantees a successful landing and removes the risk of losing the round.

Fly High also includes progression and personalization systems. Players advance through ranks by placing bets, unlocking avatars and customization options for the interface and game area along the way. A live leaderboard displays players participating in the current round alongside the biggest wins recorded in the game's history.

Set above the rooftops of a moonlit fantasy kingdom, Fly High combines glowing magical effects, floating platforms, and fast-moving flight sequences into a playful and atmospheric instant gaming experience. Depending on the selected speed mode, the game can feel calm and cinematic or fast and arcade-like, while keeping the same whimsical fantasy identity throughout the session.

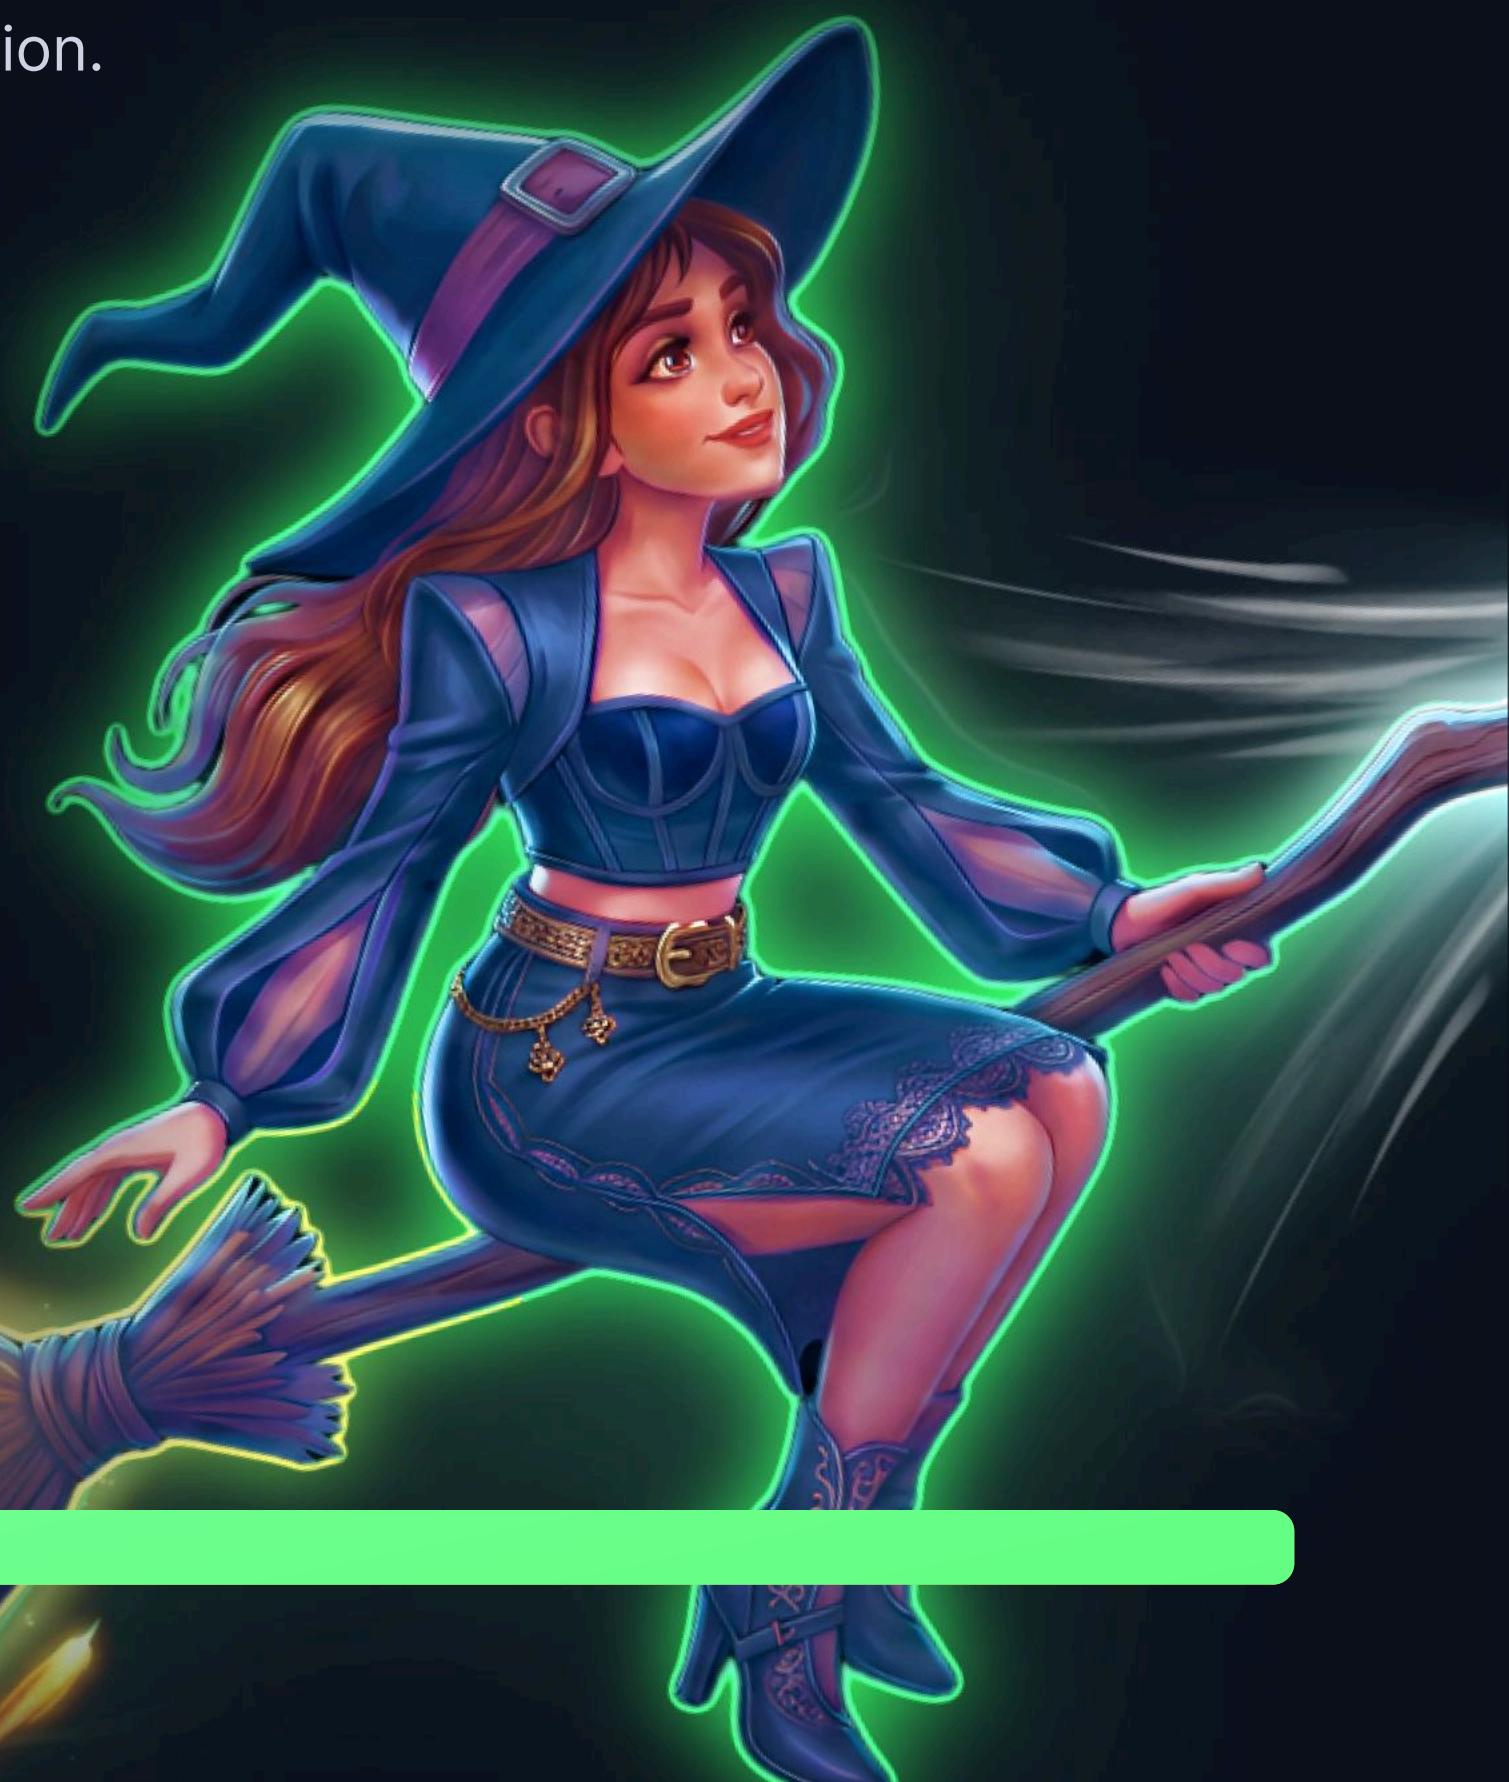

Margarita Malysheva

Head of Marketing at Mascot Gaming

Fly High has a very approachable core, while the variety of gameplay elements keeps the experience dynamic throughout the session.

It's the kind of instant game that feels destined to become a hit thanks to its atmosphere and long-term engagement potential for operators.

FEATURES

Flight Crash Gameplay

A witch flies across a large interactive map, collecting multipliers and avoiding obstacles before making a successful landing.

Booster System

Special boosters appear during the flight, helping players collect more multipliers, avoid hazards, and extend the round.

Adjustable Flight Speed

Players can choose between multiple speed settings, ranging from cinematic flights to rapid-fire gameplay sessions.

Safe Landing Mode / Bonus Buy

An optional buy-option guarantees a successful landing, removing the risk of losing the round.
