RISK GAMBLE

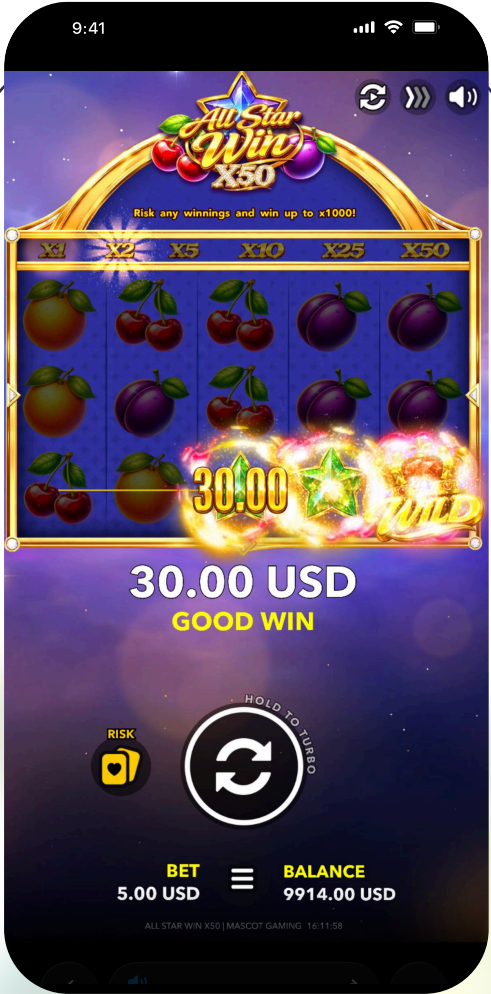

Gamble your winnings for a chance to increase them.

COMMERCIAL FEATURE

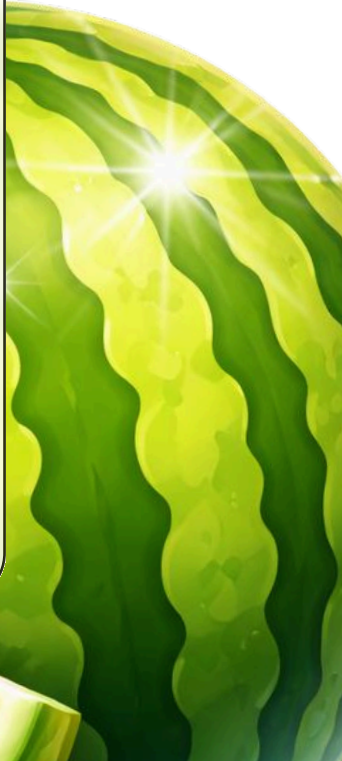

WIN MULTIPLIER

Every non-winning spin increases the win multiplier up to x50.

ADJACENT PAYS

Winning combinations can start from any reel.

GAME MECHANICS

The gameplay revolves around a **Win Multiplier that steadily builds pressure across the base game**. Every non-winning spin increases the multiplier for the next round, starting at x1 and climbing step by step up to x50. When a winning combination lands, the accumulated multiplier is applied to the win and immediately resets, creating a **repeating cycle of build-up and release**.

Wins are supported by an **Adjacent Pays system**, allowing combinations to form from any reel. This opens up more frequent winning paths and keeps base gameplay active.

Wild symbols substitute all standard symbols except Scatters, helping complete combinations and improve win consistency. Scatter symbols act as high-value standalone rewards, supporting top-end wins alongside standard combinations.

After a winning spin, players can enter the Risk Game and gamble their win by choosing a card colour. A correct guess increases the payout through an additional multiplier, adding a simple risk layer on top of the base game progression.

DESIGN

A bright, modern interpretation of a classic fruit slot, where clean visuals and bold symbols keep the pace sharp and immediately readable. The game carries a familiar rhythm, while the underlying progression adds a quiet sense of tension that builds with every spin. The soundtrack strengthens this atmosphere - a live-casino-inspired music that brings subtle pressure and energy into the session.

Margarita Malysheva, Head of Marketing at Mascot Gaming:

"Our Big Win series is one of Mascot Gaming's most consistently high-performing slot lines, with each release regularly ranking among the strongest titles of the year. This new entry continues that trajectory, building on a clear and familiar structure that players already recognise and respond to."
