

— SWEETER RISKS, BIGGER STEPS — IN THE NEW GAME BY TTT GAMES

ROOSTER RUN 2

TTT Games, a division of Mascot Gaming, returns to one of its most recognisable titles with Rooster Run 2 — a fully upgraded step-by-step crash game that keeps the nerve of the original and wraps it in a bright, candy-coloured world.

The core is still beautifully simple. With every step the multiplier grows, and every step asks the same question: cash out now, or push one further for more. What has changed is everything around it — a playful candy-themed field, smoother animation, and a rooster charming enough that leaving him behind actually stings.

Risk appetite is still a matter of choice. Players pick between three risk levels — low, medium, or high — and the boldest can chase multipliers of up to x10,000, with every step along the way a decision of its own.

The headline addition is Bonus Buy. This paid bonus round plays out as a series of automatic jumps, with the rooster cashing out on his own at the last safe platform, always stopping while he's ahead. Every multiplier collected on the way there is locked in and credited to the balance, hands-free from start to finish.

For faster sessions, Instant Autoplay rapidly simulates multiple rounds using predefined settings, delivering high-volume play in seconds. Ranks reward every bet placed, unlocking new avatars and customization elements, while customization options let players restyle the game area and interface to their own taste.

Margarita Malysheva

Head of Marketing at Mascot Gaming

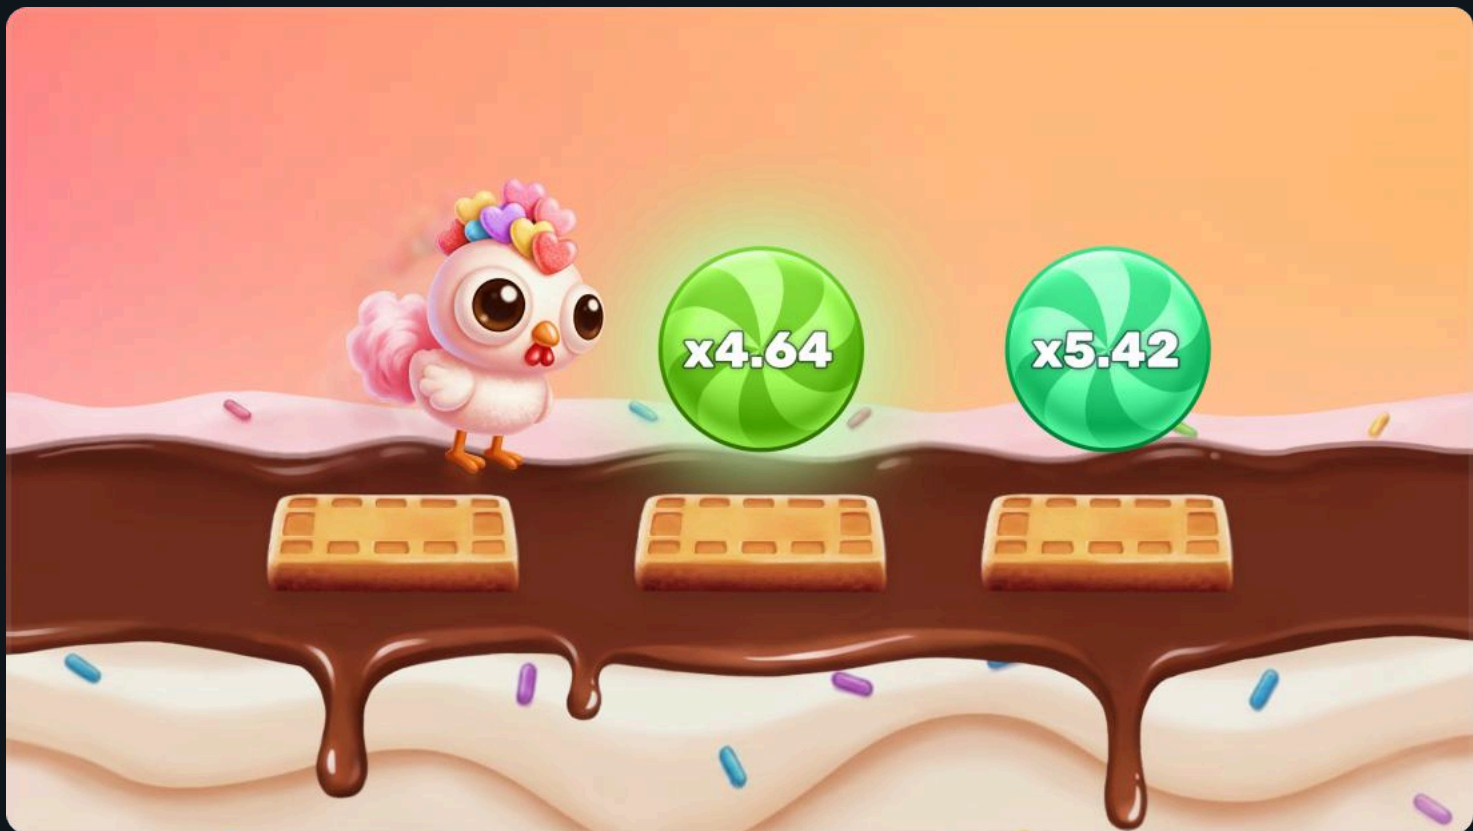

"Rooster Run found its audience fast, so the brief for the sequel was straightforward: keep what worked and give players more room to play with it."

The candy direction and the bonus round do exactly that."

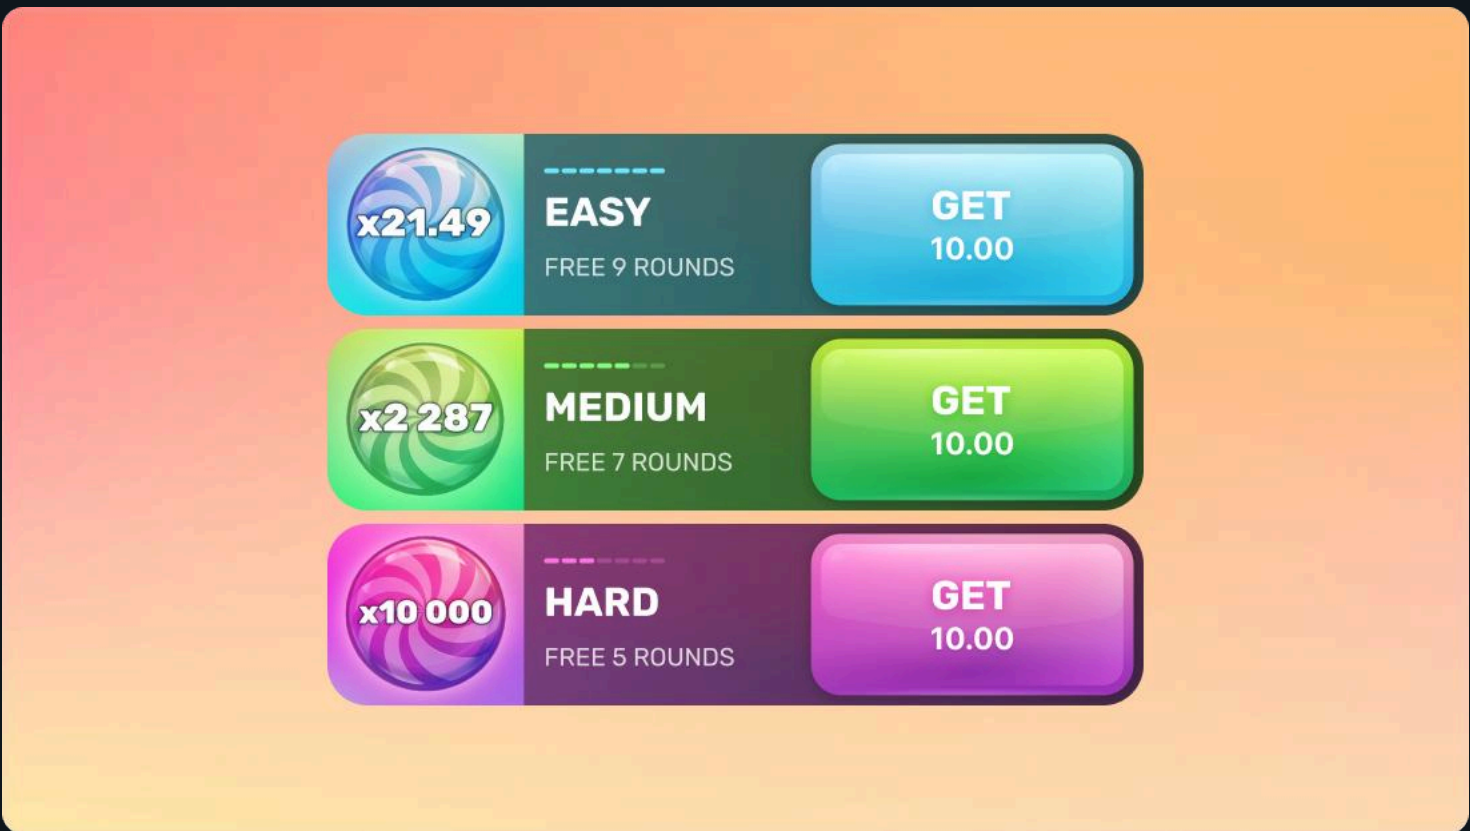

FEATURES

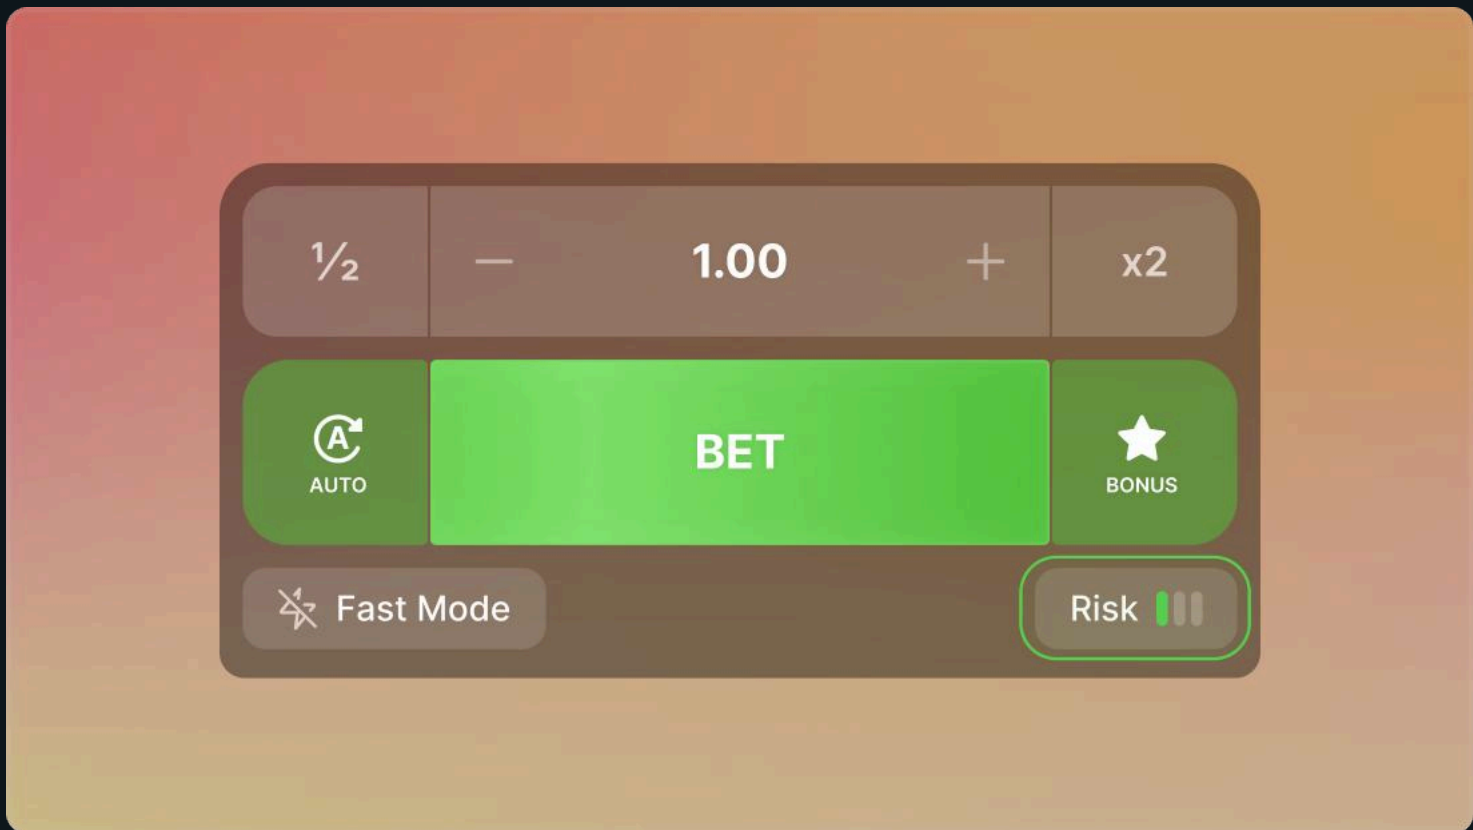

Step-by-Step Crash Game

A step-based crash experience: with each step, the multiplier increases, and players must decide whether to cash out or risk advancing to the next step for higher rewards.

Bonus Buy

A paid bonus round consisting of a series of automatic jumps, where every collected multiplier is locked in and credited to your balance - even if the rooster slips along the way.

3 Risk Levels

Several risk levels, with the highest risk offering a multiplier of up to x10,000.

Ranks & customization

By placing bets, players advance through ranks, unlocking new customization elements and avatars.
